## CARBON FIBER BAG

Carbon fiber is a much lighter but stronger material, it is with the characteristics of high strength high modulus heat-resistant, erosion-resistant etc.

Usually it is only used for phone cover, or automotive parts, rarely used as bags, now we find the way to make stitching bags with Genuine Carbon Fiber. This kind of bag is very firm but light, it is resistant to water, dust, oil, sweat and more.

The shape of the bag can be changed, and the inside structure can be changed as your request for different functions.

Tooling and sample time is 5-7 days based on the design

Leading time: 20 days after sample confirmed
